

BASIR AHMAD

Frontend Developer

+91 7982703595 | basirahmadmalik@gmail.com | Delhi, India

SUMMARY

I am a **Frontend Developer** with over 6 months of hands-on experience in crafting responsive web applications using **React.js**, **Next.js**, and **Tailwind CSS**. I have successfully delivered multiple frontend projects focused on **clean UI** and **modular architecture**. My skills extend to **Git**, **Vercel**, and **Appwrite**, complemented by a strong foundation in performance-oriented frontend practices. I'm eager to contribute to impactful teams and advance in my development career.

SKILLS

- **Programming Languages & Web Technologies:** HTML, CSS, JavaScript, TypeScript, C/C++
- **Frontend Libraries & Frameworks:** React.js, Next.js, Redux, React Router, Framer Motion
- **Styling Frameworks:** Tailwind CSS, Bootstrap
- **Tools and Platforms:** Appwrite - Authentication, Database, File Storage, Git, GitHub, Vercel
- **Additional Skills:** API Handling, Responsive Web Design, SEO Optimization, Basic Data Structures, Prompt Engineering - Basic Understanding

PROJECTS

Personal Portfolio Website

- Developed a fully responsive, **mobile-first** portfolio using **Next.js**, **TypeScript**, and **Tailwind CSS**, achieving **100% cross-device compatibility** and integrating **SEO** best practices to improve discoverability.
- Designed a scalable project architecture using **modular folder structure** and **reusable React components**, **reducing code duplication by 50%** and promoting maintainable, consistent development practices.
- Integrated **GitHub repository links** and a fully functional **contact form** to enhance interactivity, improve user engagement, and enable direct **communication** through the portfolio.
- Optimized website performance by implementing **Next.js image optimization** and **metadata configuration**, improving SEO and **reducing load times by 40%**, leading to a significantly faster and user-friendly experience.
- Deployed the application on **Vercel** using a **CI/CD pipeline** to enable automated builds, ensure consistent production releases, and deliver **high-performance** hosting with minimal downtime.

Whispr – Full-Stack Blog Application

- Built a production-ready **blog application** using **React**, **Redux Toolkit**, **React Router**, and **Tailwind CSS**, featuring a scalable codebase and an intuitive user interface designed for maintainability and engagement.
- Implemented post management with **real-time CRUD operations**, allowing users to create, edit, and delete blog content with UI updates in under **400ms**.
- **Secured user sessions** and access control using **Appwrite Auth**, protecting **100% of private routes** and improving platform security.
- Integrated image upload and media storage using **Appwrite Storage**, **reducing manual file handling effort** by approximately **50%**.
- Implemented **protected routing** and dynamic navigation logic using **React Router**, ensuring seamless user flow and context-aware route handling based on authentication state.
